

Can you use your knowledge of the inverse to solve these calculations?

1

$15 + 4 = 19$

$19 - 15 = \underline{\quad}$

1 mark

2

$21 + 4 = 25$

$25 - 21 = \underline{\quad}$

1 mark

3

$18 + \underline{\quad} = 20$

$20 - 18 = \underline{\quad}$

1 mark

4

$30 = 20 + \underline{\hspace{2cm}}$

$20 = 30 - \underline{\hspace{2cm}}$

1 mark

5

$61 + 4 = \underline{\hspace{2cm}}$

$65 - 4 = \underline{\hspace{2cm}}$

1 mark

6

$19 - 3 = 16$

$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

1 mark
